For the GP, Syndicator, or Fix-and-Flip Operator Looking for an LP Position

Why we are writing

We are not pitching another operator's deals to you. We are inviting you to put a small amount of your own capital with another operator in a market you don't compete in.

VisionWise Capital is a 12-year, 24-deal coastal Southern California multifamily fix-and-flip operator. Our underwriting is rigorous, our leverage is conservative, our team is in-house, and our track record is transparent — including the deal that didn't work. We are exactly the kind of sponsor an operator looks at when choosing a passive position outside their home market.

If you operate in Texas, Florida, the Midwest, or the Pacific Northwest, you are precisely the operator we want as an LP. We accept \$100,000-minimum Direct-deal LLC participation and \$500,000-minimum Sidecar single-asset LLC participation. We will share our underwriting model, our renovation scope-of-work template, and our worst-deal post-mortem on the first call.

Why VisionWise Capital matters to you

- Geographic diversification you cannot operate yourself. Coastal SoCal multifamily is supply-constrained at any cycle. You can underwrite us; you cannot replace us locally.
- ≤50% LTV after month 6. The leverage discipline you've heard about — confirmed in our worst deal, 630 W Washington, where the conservative LTV gave us optionality to hold through a hostile rate environment.
- Vertically integrated 56-person team. Full-time construction manager, ~35 in-house tradesmen. You'll recognize what that does for renovation cost certainty.
- We respect your time on the first call. Underwriting model, scope-of-work template, deal-level returns, the loss. No story-time.

How VisionWise Capital operates

We acquire under-managed multifamily property in coastal Southern California — five to seventy-five units, vintage 1940 to 2000 — and improve it to market standard. The playbook is three steps:

- Acquire patiently. We track properties for months at our price, not the seller's. The completeness of our buyer package wins deals where the highest offer does not.
- Modernize in-house. We employ a full-time construction manager with 30 years of experience and roughly 35 in-house tradesmen. The work is not subcontracted to whoever returns the call.

- Move rents to market. Eighteen to twenty-four months later, the property is at market rents and operating at stabilized cap rates. We hold for income or sell for capital appreciation.

Across 24 deals over 12 years, the portfolio has produced 23.95% average levered project returns — including a -33% paper-loss deal we will discuss before any other deal.

Case study one

374 Cypress Drive — Laguna Beach (Cypress Garden Apartments)

Stabilized · 10 units · Acquired September 2020

Headline

Estimated 72.30% levered project return

A 10-unit "trophy" coastal asset originally built in 1948 — 1,618 feet from Main Beach in Laguna. The acquisition is itself the story: VWC reviewed the property in April 2020 at \$1M below the listing price. The team waited four months while the seller resisted. By July, terms had moved to VWC. The deal closed in September 2020 — VWC's first acquisition for Multifamily Fund IV.

What this deal teaches

Patience on entry, not optimism on exit. The broker cited two reasons VWC won the deal: the completeness of the buyer package, and VWC's existing ownership of two other Laguna Beach properties within walking distance. Submarket density compounds.

The numbers

Acquisition	\$4,050,000 (\$405K/unit)

CapEx	\$391,749
Total cost	\$5,014,749
Loan	\$2,822,000 (56% LTV)
Estimated market value	\$6,600,000 (\$660K/unit)
Estimated profit	\$1,585,251
Levered return	72.30%

Case study two

630 W Washington Avenue — San Diego

Stabilized · 12 units · Acquired December 2021

Headline

Estimated -33.01% levered project return (paper loss, unrealized)

The only deal in the VWC portfolio currently marked at a paper loss. Acquired in the last weeks of 2021, before the rate environment shifted decisively in 2022. VWC has chosen to operate the asset through the cap-rate widening rather than force a disposition into a weak window. Conservative 50% LTV gave VWC the optionality to hold.

What this deal teaches

Honest track records include the deals that didn't work. A 70%–80% LTV operator would face refinance pressure in this rate environment. VWC can wait. The story this asset tells is about leverage discipline — investors who avoided forced losses through 2022–2024 set their LTV ceiling before the cycle turned.

The numbers

Acquisition	\$3,530,900 (\$294K/unit)
CapEx	\$334,949

Our values, briefly

VisionWise Capital is governed by two pairs of values. The first pair — Entrepreneurial, Strategic Thinker, Resolute — describes how we work. The second pair — Faith and Clear Conscience — describes the standard we hold ourselves to.

Committed to investors over projects.

That is not a tagline. It is one of the four enumerated commitments under our Clear Conscience value, and it is what produced the leverage discipline that protected the portfolio through 2022–2024.

Next step

Please reply with two or three specific underwriting questions. We will answer them in writing, then schedule a 30-minute call. Operators do better diligence than retail LPs, and we appreciate it.

The best LP feedback we get comes from other operators. Pitch is fastest when it doesn't have to happen.

With respect,

Sanford D. Coggins
