VWC ACQUISITIONS FUNNEL

• PRELIMINARY VIEW

Our underwriting staff fields potential deals from many sources: brokers, MLS, CoStar, off-market, pre-market, etc. Each deal receives a 10-minute 'first look' to determine viability for acquisitions.

• UNDERWRITTEN

We input in-place performance data, capital improvement estimates, short-term projections, long-term projections, and many other data points to determine a purchase price and timeline that fits our investor guidelines.

• TERM SHEET / PSA

Once a purchase price is determined, we submit a Term Sheet to the seller or listing broker that lists the price and terms under which we would be interested in purchasing. If the seller is ready to engage, we escalate to a Purchase and Sale Agreement.

• NEGOTIATIONS

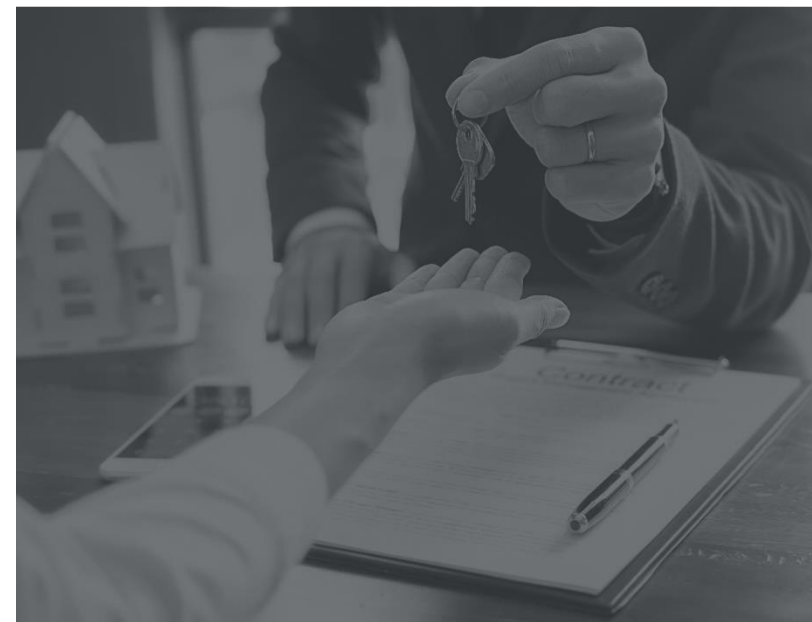

It is common for negotiations to take place over several days, or even 2-3 weeks. As negotiations take place, our team continues to gather data, intel, or any information that will help us to acquire the property at advantageous price and terms.

• ACTIVE ESCROWS

Once an accepted Purchase and Sale Agreement is reached, the real work has just begun. Our team is actively working through inspections and other due diligence processes to thoroughly understand the asset prior to closing.

Capitalism With A Heart

When residents feel respected, they more often pay their rent on time. We do our part to respect them, and that comes in the form of renovation work and being a face to the name instead of just a mailing address.
