

630 W. Washington Avenue

San Diego, CA · 12 units · Acquired December 2021

EST. LEVERED RETURN -33.01%	ESTIMATED LOSS -\$705,203
---------------------------------------	-------------------------------------

THE OPPORTUNITY

A 12-unit asset in San Diego — acquired the same day as 9062 Kenwood Dr (Spring Valley) as part of VWC's late-2021 expansion into the San Diego metro. The deal closed in a market peak — the last weeks of 2021, before the rate environment shifted decisively in 2022.

THE STRATEGY

Standard value-add lifecycle. CapEx of \$335K (9.5% of acquisition) covered the planned reposition. The asset is currently held at stabilization rather than sold — VWC has chosen to operate it through the cap-rate widening rather than force a disposition into a weak window.

DEAL SNAPSHOT

Acquisition Price	\$3,530,900	Loan Amount	\$2,118,600
Per Unit	\$294,000 / unit	Loan-to-Cost	50%
CapEx	\$334,949	Equity Invested	\$2,136,603
Total Cost	\$4,255,203	Est. Market Value	\$3,550,000
Hold Period	Stabilized	Exit Per Unit	\$296,000 / unit

INVESTOR TAKEAWAY

This is the only deal in the VWC portfolio currently marked at a paper loss — and it is included in this library because honest track records include the deals that didn't work. The loss is on estimated market value, not realized; the asset is still held and operating. 50% LTV gave VWC the optionality to hold rather than face refinance pressure. Across 23 deals, the portfolio has produced \$12.8M in cumulative profit and 23.95% average levered returns — one paper loss in a programmatic strategy is the cost of running enough deals to compound, not a strategy failure. The story this asset tells is about leverage discipline.
