

INVESTOR ACQUISITION STRATEGY

Two Engines, Ten Personas

Matching every VisionWise investor persona to the right channel — Validation
SEO/GEO for the searchers, AI-powered outbound for the enumerable.

PREPARED FOR

VisionWise Capital

Sanford D. Coggins · 2026 Capital Plan (\$10M) · 2027 (\$25M)

THE OPERATING THESIS

One question decides the channel

Can you build a named list of this investor? If yes — we hunt them with AI-powered outbound. If no — if they are an anonymous searcher with a problem — we make sure VisionWise is the answer they find.

ENGINE 1 · INBOUND

SEO / GEO

Catch the raised hand

For investors you **cannot enumerate** — event-triggered, self-educating people searching Google and asking AI assistants (ChatGPT, Perplexity, AI Overviews).

- ▶ Validation layer for whales who Google VWC after a touch
- ▶ Educational + GEO capture for searcher personas
- ▶ Runs in the SEO repo · compliance-gated (RIA)

ENGINE 2 · OUTBOUND

AI Lead Gen

Build the list. Reach out.

For **enumerable, reachable** universes — family offices, RIAs, apartment owners, operators — identified, enriched, and engaged across digital *and* analog touches.

- ▶ Apollo · Hunter · ATTOM · BatchData · OpenCorporates
- ▶ LinkedIn Sales Navigator · SEC IAPD · FINTRX
- ▶ AI scoring + personalization → HubSpot → SDC closes

VWC's 2026 goal is **\$10M raised** (\$25M in 2027), anchored by a **\$30M revolving line of credit from a single family office**. That anchor is pure outbound — SEO will never land it. The two engines are complementary: outbound creates awareness; SEO/GEO validates and captures the searchers outbound can't see.

GUARDRAIL — VISIONWISE SELLS SECURITIES UNDER REG D 506(C)

VWC is **not** a registered investment adviser or broker-dealer — it is a private sponsor of its own offerings. Every external word is a securities-offering communication under the federal anti-fraud rules (Rule 10b-5). Under **Rule 506(c)**, general solicitation **is permitted**, but every investor's accredited status must be **verified** (reasonable steps, not self-certification) before they invest. Accredited investors only. No misleading or cherry-picked performance, no "safe/guaranteed," no forward promises without review.

THE MAP

Three categories. Ten subcategories.

VWC's market resolves to three accurate categories — **Family Offices**, **RIAs**, and **Accredited Investors** (a deliberately broad umbrella, so no slice of the market is missed). The ten personas below are operational subcategories within those three, each matched to an engine.

CATEGORY	PERSONA	ENGINE	PRI.	FIRST MOVE
Family Office	P1 · Family Office — the \$30M LOC anchor	AI LEAD GEN	P0	FOX/Buttonwood list → dimensional mailer + warm intro
RIA	P6 · RIA / Advisor	AI LEAD GEN	P0	SEC IAPD list → RIA-to-RIA email + IC briefing
Accredited	P3 · 1031 Exchangor	BOTH — SPLIT	P1	GEO/SEO hub for investor + QI partner pack
Accredited	P5 · SDIRA Self-Directed	BOTH — SPLIT	P1	SDIRA education hub + custodian webinar deal
Accredited	P8 · Recently Liquid	BOTH — SPLIT	P1	"Windfall" content + CPA/M&A referral track
Accredited	P2 · HNW CRE Vet ("Tired Landlord")	AI LEAD GEN	P2	ATTOM/BatchData on 15k scrubbed owners → mail
Accredited	P7 · Tech / Medical high-income	BOTH — SAME PERSON	P2	LinkedIn title-targeting + tax-benefit content
Accredited	P4 · Income Retiree (net-new only)	SEO / GEO	P2	"Passive income for retirement" education
Accredited	P10 · Co-Sponsor / Operator	AI LEAD GEN	P2	LinkedIn + operator forums (GoBundance, BP)
Accredited	P9 · Faith-Based	WARM INTRO	P3	NCF/Halftime/C12 introductions only — no cold

Not shown: the existing ~127 LPs (~85% repeat, mostly P4). They are neither engine — they are **CRM nurture** in HubSpot + AppFolio. Do not spend acquisition budget re-acquiring investors VWC already has; recycle their distributions into new deals.

ENGINE 1 — SEO / GEO

Be the answer they find

Two postures: **validate** the whales who Google VWC after a touch, and **capture** the searcher personas at their moment of need (gated by the Reg D exemption). Full keyword + GEO clusters live in the SEO repo persona doc.

P3 — 1031 Exchangor

CAPTURE · FLAGSHIP

On a 45-day clock, searching urgently. We rank + get cited for the replacement-property question; Sidecar is 1031-eligible.

"Can I 1031 into an apartment syndication closing this month?"

P5 — SDIRA Investor

CAPTURE

Self-educators with IRA cash "doing nothing." Own the SDIRA-in-real-estate + UBIT explainers; feed custodian webinars.

"How do I invest my IRA in an apartment building?"

P8 — Recently Liquid

CAPTURE

Just sold a business / inherited. Bewildered, asking AI. Own the "first 12 months after a windfall" playbook.

"I sold my company for \$5M — how should I invest it?"

P7 — Tech / Medical

CAPTURE (+ OUTBOUND)

Research tax/depreciation heavily. Honest "passive RE for high earners" content; LinkedIn runs in parallel.

"How can a physician cut taxes with real estate?"

P4 — Income Retiree

EDUCATE (NET-NEW)

Searching for income alternatives. Repurpose SDC's "REITs vs direct" blog. Existing LPs excluded — they're nurture.

"Best tax-advantaged income outside the stock market?"

P1 & P6 — Whales

VALIDATE ONLY

Family Offices & RIAs don't search for sponsors. SERP must own the brand, knowledge panels, institutional long-tail, REIT-conquesting.

Branded + "sub-50 LTV multifamily fund"

THE CAPTURE TRACK IS PERMITTED — WITH VERIFICATION

Because VWC uses **506(c)**, the searcher pages **may solicit** (not merely educate) — provided any offering action gates on **verified** accredited status. GEO amplifies risk — AI engines quote pages out of context, so no extractable performance/forward claim. Counsel reviews every template.

ENGINE 2 — AI LEAD GEN · DIGITAL

Build the list. Reach the inbox.

A repeatable machine: identify a finite universe, enrich it, verify it, let AI score fit and personalize at scale, then run multi-touch sequences into HubSpot for SDC to close.

SEC IAPD Free Form ADV — every RIA by AUM/geo (P6)	FINTRX Verified family-office CIO contacts + mandates (P1)	Apollo B2B contacts, emails, firmographics (P6/P7)
Hunter Email discovery + deliverability verification	ATTOM Apartment-owner property data & value (P2)	BatchData Owner skip-trace / contact append (P2)
OpenCorporates Entity & officer data behind LLCs/offices	LinkedIn Sales Nav Title/firm/geo targeting, social selling (P6/P7/P10)	HubSpot CRM + sequences — the destination of record

STEP
1-2

Identify & enrich

Pull the finite universe (IAPD, FINTRX, ATTOM). AI scores each record for ICP fit; Apollo/Hunter/BatchData append + verify contacts. 100 verified targets beat 5,000 unverified.

STEP
3

Personalize at scale (AI)

AI drafts persona-calibrated, SDC-voice copy referencing the specific firm/property/event — reviewed, never auto-sent. Compliance-checked templates.

STEP
4

Multi-touch sequence

LinkedIn connect (no pitch) → value email → proof (track record / case study) → invite. Email infra on a dedicated domain (SPF/DKIM/DMARC) for family-office deliverability.

STEP
5

Route & close

Engaged leads flow to HubSpot; SDC and team take the meeting. AppFolio handles post-investment IR — we don't duplicate it.

Digital tactics by persona: P6 RIA — IAPD+Apollo, RIA-to-RIA email, IC pre-read. P1 — FINTRX, hyper-personalized email to warm the intro. P7 — LinkedIn Sales Nav by title/specialty + tax content retarget (first-party only). P2 — property-data mail-match + email append. P10 — LinkedIn "Managing Partner + RE" outside SoCal. CP1/CP2 — partnership outreach to QIs & custodians.

ENGINE 2 — AI LEAD GEN · ANALOG

The touches that close eight figures

Family-office and RIA capital is won offline. Digital warms and validates; analog converts. Every analog touch is logged back to HubSpot so the two engines share one pipeline.

Dimensional mailers

P1 · P2

Physical, premium leave-behind to the top 50 family offices & high-value owners — cuts through a screened inbox. Counsel-reviewed creative.

Conferences

P1 · P5 · P10

Built around the 4 confirmed converters: **FOX, Buttonwood, TNDDA, Fact Right**. Speaking > attending.

Private briefings

P1 · P6 · P8

Intimate investor dinners & IC briefings — the room where allocators decide. Bring CPA/attorney for P8.

Handwritten notes

P1 · P9

Post-intro, post-meeting. Signals the "investors over projects" character that values-driven LPs screen for.

COI / referral

CP1 · CP2 · CP3

QIs, CPAs, custodians, and faith networks (NCF/Halftime/C12). One relationship = recurring warm flow.

15k-owner direct mail

P2

VWC's scrubbed apartment-owner list — the "done being a landlord?" letter, mail-matched to ATTOM data.

Custodian webinars

P5 · CP2

Get on Equity Trust / STRATA / Quest education circuits — hundreds of warm SDIRA holders per session.

Phone

P2 · P3 · P10

For time-pressured (1031) and operator-to-operator (P10) conversations — fast, direct, high-trust.

Roundtables

P6

Closed-door RIA roundtables on RIA-friendly RE alternatives — SDC's Merrill pedigree is the draw.

The split that matters: for P1 (the LOC anchor), **analog is primary** — the wire follows a dinner and a binder, not an email. Digital exists to make the analog touch land warm and to ensure the post-touch Google search confirms institutional quality (Engine 1).

THE PLAYBOOK

How we go after each persona

Priority personas P1–P5. Digital + analog plays, the first asset to lead with, and the metric we hold ourselves to.

PERSONA	ENGINE	DIGITAL	ANALOG	FIRST ASSET	KPI
P1 Family Office	OUTBOUND	FINTRX list, hyper-personal email, LinkedIn warm-path	Dimensional mailer, FOX/Buttonwood, dinner, binder	LOC structure brief + track record 1-pager	Meetings booked; LOC term sheets
P6 RIA / Advisor	OUTBOUND	IAPD+Apollo, RIA-to-RIA email, IC pre-read	Closed-door roundtables, FPA deck	FPA presentation + SDC bio	IC briefings; first placements
P3 1031 Exchangor	BOTH	GEO/SEO 1031 hub, FAQ schema, retarget	QI partner pack, phone (clock-driven)	1031 explainer + active offering summary	Organic 1031 leads; QI referrals
P5 SDIRA Investor	BOTH	SDIRA + UBIT education hub, custodian-page SEO	Custodian webinar circuit (Equity Trust...)	SDIRA subscription packet + direct-deal 1-pager	Webinar slots; SDIRA subscriptions
P8 Recently Liquid	BOTH	"Windfall" GEO content, advisor-co-branded pages	CPA / M&A / estate-attorney referral track	"First 12 months" liquidity playbook	Referrals from CP1; conversations

P1 and P6 are **outbound-primary** (SEO only validates them). P3/P5/P8 are the **split-target** personas: SEO/GEO catches the end investor in the moment of need while outbound builds the gatekeeper relationships (QIs, custodians, CPAs) that refer the same people in volume.

THE PLAYBOOK

...continued — P2, P7, P4, P10, P9 + partners

PERSONA	ENGINE	DIGITAL	ANALOG	FIRST ASSET	KPI
P2 HNW CRE Vet	OUTBOUND	ATTOM/BatchData mail-match, email append	15k-owner "done being a landlord?" mail, phone	Sidecar 1-pager + Charlene case study	Owner replies; sidecar subs
P7 Tech / Medical	BOTH	LinkedIn by title/specialty + tax-benefit content	Assn. talks (AMA/ADA), podcast guesting	RE tax-benefits 1-pager + direct deal	Organic + LinkedIn leads
P4 Income Retiree (net-new)	SEO	"Passive income" + REITs-vs-direct content	Bisnow/IMN presence (light)	"REITs vs direct" + distribution history	Organic income-seeker leads
P10 Co-Sponsor	OUTBOUND	LinkedIn "Mng Partner + RE" outside SoCal	GoBundance, IMN, Best Ever Conf	Underwriting sample + vertical-integration story	Operator co-invests
P9 Faith-Based	WARM	Values content (credibility only, no capture)	NCF / Halftime / C12 intros only	Core Values doc + SDC bio	Warm intros received
CP1 CPA/QI/Attorney	OUTBOUND	Targeted email + co-branded explainers	Quarterly update + annual briefing invite	"Trusted-sponsor" partner pack	Referrals generated
CP2 SDIRA Custodian	OUTBOUND	Sponsor brief to education teams	Webinar partnership pitch	30-min custodian intro deck	Webinars booked
CP3 Faith networks	WARM	— (referral, not digital)	Relationship-led intros to P9	Stewardship/character story	Intros into P9

Channel partners (CP1–CP3) are gatekeepers, not investors — but they are the highest-leverage targets: one custodian webinar or one trusted CPA can deliver a recurring stream of P3/P5/P8 investors at near-zero marginal cost.

ACTIVATION

The first 90 days

Sequenced so the highest-value, lowest-friction capital moves first — while the compounding SEO/GEO assets are built in parallel.

WEEKS
1-2

Foundation

- ▶ Stand up 506(c) accredited-investor verification — unlocks the SEO capture track (general solicitation permitted)
- ▶ Stand up enrichment stack + dedicated outbound email domain
- ▶ Build the P1 (FINTRX) and P6 (IAPD) target lists; AI-score for fit

WEEKS
3-6

Outbound live + content drafted

- ▶ Launch P6 RIA + P1 family-office digital sequences (warm the intro)
- ▶ Draft SEO/GEO hubs (1031, SDIRA, windfall) + 5 case studies → counsel
- ▶ Open QI & custodian (CP1/CP2) partnership conversations

WEEKS
7-12

Analog + capture online

- ▶ Dimensional mailers to top-50 family offices; 15k-owner mail (P2)
- ▶ Publish counsel-approved GEO hubs + case studies on the alpha site
- ▶ First custodian webinar booked; first private briefing scheduled

8-12

QUALIFIED CONVOS / MO

SDC-ready, by end of Q1 (confirm target)

250

VERIFIED TARGETS

P1 + P6, fully enriched

5

GEO HUBS LIVE

1031, SDIRA, windfall, tax, income

2-3

PARTNER CHANNELS

QIs / custodians in motion

100%

BRANDED SERP

owned/authoritative (Engine 1)

0

COMPLIANCE INCIDENTS

the non-negotiable metric

GUARDRAILS

Compliance is the strategy, not a footnote

HARD RULES (VWC SELLS 506(C) SECURITIES — NOT AN RIA)

- ✗ No performance claim, forward-looking return, or "safe / guaranteed / no-risk" language without outside-counsel review
- ✗ 506(c): general solicitation permitted, but every investor's accredited status must be **verified** (not self-certified)
- ✗ Accredited-investor verification gates any offering action; case-study performance stays counsel-reviewed
- ✗ No aggressive tracking / retargeting to consumer audiences; first-party, privacy-grade only
- ✗ Track record shown in full — including the disclosed loss; no cherry-picking

What we need from VisionWise

- 1 **Stand up accredited-investor verification** (506(c)) — the gate that lets the SEO capture track go live.
- 2 **Ratify persona priorities** — confirm P1 (LOC) + P6 + the P3/P5/P8 split as the Q1 focus.
- 3 **Grant tool + data access** — HubSpot, LinkedIn admin, FINTRX budget, and the 15k-owner list.
- 4 **Name the compliance counsel** for the content-review SLA.
- 5 **Approve the alpha-site case studies** for counsel review → publish.

Let's turn the map into pipeline.

Two engines, ten personas, one shared HubSpot pipeline.

Technijian

technology as a solution

RJain@technijian.com · technijian.com

Companion artifacts: SEO/GEO persona & keyword map and 5 alpha-site case studies are filed in the VWC SEO repo (visionwisecapital.com / 01_Deep_Discovery & 03_Content_Production). This report is the cross-channel strategy that governs both engines.
